### HEPA FILTERS AND HOUSINGS

#### HEPA滤网与外罩

Entry of dust particulates is prevented by attaching a good quality particulate filter ahead of the instrument sampling inlet. OTC Tritium Monitors are never to be operated without a dust filter in the sample stream. It is IMPERATIVE that the sample stream be free from dust, dirt or moisture. Not only will the instrument show erratic behavior, but it may cease to function entirely.

在仪器样品输入口前部附上一个高质量的粒子过滤网，阻止了粒子进入。OTC产品永远都在样品流中安装过滤网。这一点非常重要，保证了样品流无尘土和水分。否则，不但仪器性能不稳定，还有可能完全停止运转。
